

TESTS OF EMERGENCY ALARMS/SIRENS

As part of industry's commitment to workplace safety and health, and a safer community, a number of companies in the Kwinana Industrial Area conduct weekly tests of their emergency alarms/sirens. The installation and testing of the alarms/sirens is an integral part of the Kwinana Industries Mutual Aid (KIMA) scheme that has been established by the companies to share emergency response expertise, manpower and resources in the event of a major incident.

For your information, the testing of alarms/sirens will be conducted on the following days.

(Please note that testing of alarms/sirens may occur outside of these scheduled times due to system maintenance).
